

BankWorld Architectural Overview

BankWorld delivers a complete set of self-service banking features from a single integrated platform. This course teaches participants about the various components that together make up this platform.

This eLearning course contains activities that challenge the participants to actively engage in the learning process.

Benefits:

After taking this course, you will be better prepared to operate the BankWorld system more effectively and efficiently as you will have an in-depth understanding of the basic architecture of the system. Having an overall understanding enables bank staff to understand how the various components interact and affect each other. This allows bank staff to plan their implementation of the system more effectively and be better prepared for managing the system.

Our training is a blend of classroom and online training and includes:

- Overviews
- Installation
- Configuration
- Operations
- Tools
